Endocrine System: TEAS || RegisteredNursing.org

I love seeing that "lightbulb" moment when students realize that they've been making the endocrine system a lot harder than it needs to be. Which is why I was so surprised when I realized that I've never, ever explained the best way to study Endocrine diseases on this blog. After all, Endocrine is only about the scariest, most intimidating, and seemingly complicated Med-Surg topic that ...

How to Study Endocrine in Med-Surg - Your Nursing Tutor

There are eight major glands that help in the functioning of the endocrine system. These are the pituitary gland, hypothalamus, thyroid, parathyroid, adrenals, pineal body and the reproductive glands (testes and ovaries). The pituitary gland is integral to the whole system.

Endocrine System Study Guide Nurses - modapktown.com

A great way to study Endocrine diseases is to start with two columns: one for hyper function and one for hypo function. On the side of your columns, write out each receptor gland (i.e. pancreas, thyroid, etc). Then start filling out your chart by listing the symptoms, treatment, and nursing care for each gland when it is hyper and hypo function.

How to Easily Learn Endocrine Disorders - Your Nursing Tutor

The major endocrine organs of the body include the pituitary, thyroid, parathyroid, adrenal, pineal and thymus glands, the pancreas, and the gonads.
