Heart and Brain: Gut Instincts - the Awkward Store

Neuroscience over the last few years has shown that aside from your head brain (the one we're all familiar with, the 'cephalic brain'), we also have a heart brain ('cardiac brain') and a gut brain ('enteric brain'). Each of these brains is a sophisticated system of sensory neurons, motor neurons, neurotransmitters, and ganglia.

Head, Heart, and Gut: The Three Brains that Control Our ...

It's a primal connection, between the brain and the gut, that works to keep us safe from predators or other physical threats. It is part of our fight or flight response. This is instinct (vs intuition)...the reason for the expression: 'gut feeling'. There's no instinct vs. gut feeling in this instance.

The Awkward Yeti

Behavioural modelling expert and author Marvin Oka has an interesting claim to make on this seemingly simple issue - that we actually have three brains. They reside in the head, the heart and the gut. All three have massive networks of neurons and very distinct roles. It explains the clash between what we think and what we often feel.
