### **Download Managing The Construction Process: Estimating**

...

Construction estimating is the process of anticipating the expense of building a physical structure. This step is essential, and one of the most

# Get Free Managing The Construction

crucial in the construction process. Estimators need to be as accurate as possible because profit margins (the livelihood of contractors) are impacted if any estimated direct and indirect costs for the project are off by even the slight amount.

To Know ...**

# Get Free Managing The Construction

Construction cost estimating is the process of forecasting the cost of building a physical structure. Of course, builders and clients both worry about the financial impact of cost overruns and failing to complete a project. That's why they devote time and effort to estimating how much a project will cost before deciding to move forward with ...
