Responsive Web Design in WYSIWYG Web Builder

The great thing about Responsive Web Design in WYSIWYG Web Builder is that you have full control over the layout in different breakpoints unlike in other tools where you are force to use predefined layouts/templates. Here's an example of a basic layout:

Introduction to Responsive Web Design - The Basics

WYSIWYG Web Builder supports multiple ways to create responsive web sites. So, what is the best way? There is not really a 'best way', it depends on your personal (or customer's) preference. For example, do you want to have full control over the layout or do you want objects to automatically scale? Here is an overview of the different design techniques that are available in the software:
