The 'timeline of statistics' was designed by Tom Fryer at Sparks Publishing Services.

**The timeline of statistics | StatsLife**  
Originally, State Statistics was developed. (The word "statistics" itself evolved from word "state" meaning in Latin "status".) Statistic, since antiquity, informed the leaders of the states, what taxes to levy their subjects and how many soldiers can expect a coming war. The statistic has become a real science only after the bourgeois revolutions.

Although there have been changes to the interpretation of the word over time. The development of statistics is intimately connected on the one hand with the development of sovereign states, particularly European states following the peace of Westphalia; and the other hand with the development of probability theory, which put statistics on a firm theoretical basis. In early times,
